EDUCATION

University of Florida

Gainesville, FL

Bachelors in Computer Science + Statistics

Expected Graduation: May 2027

Relevant Coursework: Data Structures & Algorithms, Computer Architecture, Computational Linear Algebra, Discrete Mathematics, Statistics & Programming in R, AI Fundamentals

Activities & Societies: UF ACM, Artificial Intelligence Research (AIR) Group, iHeal Lab, UF ColorStack

EXPERIENCE

Machine Learning Researcher

Mar 2025 - Present

Intelligent Clinical Care Center (iHeal Lab) @ University of Florida

Gainesville, FL

- Improved a self-supervised PyTorch model predicting patient mortality with 89% accuracy, increasing prior benchmarks by 12%.
- Developed a logistic regression classifier that predicted heart failure with 90% precision, reducing false positives by 18%

Data Analyst Intern

Feb 2025 – Sep 2025

Artificial Intelligence Research (AIR) Lab @ University of Florida

Gainesville, FL

- Built web-scraping pipelines with Selenium and BeautifulSoup to extract data from 10,000+ news articles, powering a fake-news detection ML dataset used by 3+ research teams.
- Cleaned and standardized web articles with Pandas, increasing NLP model training efficiency by 25% and reducing pre-processing runtime by 60%.

Founding Engineer

Jun 2025 - Aug 2025

StreetSmart

Naperville, IL

- Co-developed StreetSmart, a computer vision-powered road intelligence MVP that transforms dashcam footage into interactive maps of road hazards, reducing manual reporting effort by 90%.
- Integrated deep learning models with Supabase and Leaflet for scalable data visualization, achieving 85%+ hazard-detection accuracy on 50+ test routes.

PROJECTS

Diploy | *TypeScript, Supabase, SQL, Next.js, OpenAI API*

November 2025 - Present

- Co-developed a full-stack job board platform for trade school students, implementing 56 Row Level Security policies across 11 database tables to enforce role-based access control for 3 user types: students, employers, school admins.
- Integrated OpenAI GPT-4 with custom function calling to build an AI-powered job posting assistant, reducing job post creation time by approximately 60%.

Personal Tutoring Website | *TypeScript, Supabase, Next.js, Stripe, Cal API*

June 2025

- Designed and deployed a full-stack tutoring platform serving 10+ weekly active users and generating \$800+ MRR through automated payments and scheduling.
- Integrated Stripe API for secure transactions and Cal API for dynamic scheduling, reducing manual coordination by 90%.

CalendAI | *Python, TypeScript, React, TailwindCSS, Node.js, Google Cloud, OpenAI*

October 2024

- Led a 4-member team to design an ADHD-friendly, AI-driven productivity web app that increased user task completion efficiency by 30% during testing.
- Outperformed 200+ participants across 50+ teams to secure 1st place UF SASEHacks 2024.

TECHNICAL SKILLS

Frontend: React, JavaScript, TypeScript, HTML/CSS

Backend: Node.js, Flask, FastAPI, RESTful APIs, TCP/IP, Stripe API

Databases & Cloud: PostgreSQL, Supabase, MongoDB, PostGIS, Azure, AWS, Google Cloud

MLOps & Data: NumPy, Pandas, PyTorch, TensorFlow, scikit-learn, Keras, OpenCV, Matplotlib

Tools: Git, Docker, VS Code, Cursor, PyCharm, Jupyter Notebooks, Anaconda, MATLAB

Languages: Python, C/C++, Java, SQL, JavaScript, TypeScript, R

Certifications: Microsoft Azure Data Fundamentals (DP-900)
